

## CORNERSTONE UNIFIED TALENT MANAGEMENT

Improving  
the employee  
experience from  
one unified  
platform

In a world of expensive hardware/software consolidation, how do HR teams select the best talent management products for the future? Cornerstone enables organizations of all sizes and in every industry to source and recruit top talent, develop and engage employees throughout their careers, improve operational execution, and cultivate future leaders.

By unifying key functional areas of employee recruiting, onboarding, development, performance, compensation, succession and collaboration into one easy-to-use system, our clients entirely eliminate the need for separate point solutions or other legacy HR technology.

Since 1999, as one of the first true cloud computing companies, Cornerstone has been delivering cost-effective, innovative technology in one unified platform to improve every aspect of the employee experience.

Less Complexity,  
More Configurability

We understand that a “one-size-fits-all” mentality to talent management simply doesn’t work. That’s why Cornerstone is entirely configurable to meet the specific needs of your organization’s talent strategy and your specific business processes and workflows.

Built for the Modern  
Workforce

With a modern user interface, we strive to create a destination where employees can work smarter and access all of their talent information. Whether employees experience Cornerstone on the web or via mobile devices, our technology is impactful and easy-to-use.

Innovative  
and Different

The marketplace for talent management technology is a complicated one – but we are working to make it simple. Rather than asking you to deal with costly upgrades, complex hybrid models or a messy patchwork of integrations, Cornerstone is a single cloud-based unified system.
